

Peer to Patent: The Community Patent Review Project

Peer to Patent is a historic initiative by the United States Patent and Trademark Office (USPTO) that opens the patent examination process to public participation for the first time. **Peer to Patent** is an online system that aims to improve the quality of issued patents by enabling the public to supply the USPTO with information relevant to assessing the claims of pending patent applications.

This pilot project connects an open network for community input to the legal decision-making process. The community supplies information and research based on its expertise. The patent examiner makes the final determination on the basis of legal standards. This process combines the democracy of open participation with the legitimacy and effectiveness of administrative decision making.

After a promising one-year pilot, the USPTO announced the extension of **Peer to Patent** until June 15, 2009. In addition, the project has expanded to include eligible applications in Technology Center 3600 Class 705 ("Data Processing: Financial, Business Practice, Management, or Cost/Price Determination") in addition to Technology Center 2100 ("Computer Architecture, Software, and Information Security").

Peer to Patent provides an opportunity to:

- Open up the closed patent review process to more information and enable better decision making.
- Improve the existing system by avoiding the issuance of overly broad patents.
- Demonstrate empirically the role that non-governmental experts can play in improving decision making.

This is more than just a Web site about patent applications—it makes public participation relevant to actual decision making.

Advisory Board Members

Tilo Bachmann
Administrator, European Patent Office

Robert Barr
Executive Director, Berkeley Center for Law and Technology
Berkeley Law School

Former Vice President for Intellectual Property
and Worldwide Patent Counsel, Cisco

John Bracken
Program Officer, MacArthur Foundation

Dennis Crouch
Patently-O
Associate Professor of Law, University of Missouri
School of Law

Sean Dennehey
Director of Patents, UK Patent Office

John Duffy
Professor of Law, George Washington University Law School

Will Fitzpatrick
Corporate Counsel, Omidyar Network

Alan Kasper
Vice President of the Board of Directors
American Intellectual Property Law Association
Partner, Sughrue Mion, PLLC

Stephen Kunin
Special Counsel, Oblon Spivak
Former Deputy Commissioner for
Patent Examination Policy, USPTO

Mark Lemley
Director, Stanford Program in Law, Science and Technology
William H. Neukom Professor of Law, Stanford Law School

Stephen Merrill
Executive Director, Science, Technology, and Economic Policy
National Academies

Mike Messinger
Director, Sterne, Kessler Goldstein, & Fox P.L.L.C.

Marcus Mueller
European Patent Office, EPO Scenarios for the Future Project

Gideon Parchomovsky
Professor of Law, University of Pennsylvania Law School

Arti K. Rai
Elvin R. Latty Professor of Law, Duke University Law School

Steven Weiner
Partner, Davis Polk & Wardwell

Terry Winograd
Professor of Computer Science, Stanford University

United States Patent and Trademark Office

How It Works

Here's how the **Peer to Patent** community review process works:

The Community Reviewers:

Find, review, and discuss patent applications submitted for open review.

Research published resources relevant to the patent application's claims.

Upload and explain prior art for the community.

Annotate, evaluate, and rank each other's prior art.

Create the "top ten" list of prior art references generated and forwarded to the USPTO.

Peer to Patent Features

Link prior art references to claims.

Evaluate the relevance of prior art to claims, creating a manageable "top ten" list for the patent examiner.

Build a team for collaboration relating to applications of interest.

Tag all aspects of an application, including prior art and commentary, in order to make it easily searchable by the community.

Participate in a process that supports more informed legal decision making.

To see the applications and participate as a reviewer, please visit www.peertopatent.org. For more information, to learn about other ways to get involved, and to read our First Anniversary Report, please visit <http://dotank.nyls.edu/communitypatent> or e-mail info@peertopatent.org.

Submit Your Application for Review

Peer to Patent is accepting patent applications in Technology Center 2100 (Computer Architecture, Software, and Information Security) and Technology Center 3600 Class 705 (Data Processing: Financial, Business Practice, Management, or Cost/Price Determination)

As a participating inventor you:

- Get your application reviewed sooner.
- Strengthen the quality of your patent.
- Find information to make your application better.
- Participate in improving the patent examination process.
- Enjoy the benefits of community review and research.
- Discover the community of innovators with common interests and expertise.

By submitting an application you:

- Receive up to four months of community review and research.
- Have your application advanced more expeditiously.
- May request early Pre-grant Publication, pursuant to USPTO rules.
- Add an audio, video, or text introduction to your application to focus community attention.
- Receive assistance from the USPTO to determine whether your application is eligible.

Apply now for admission to the pilot! To submit a request to have your application reviewed, go to www.peertopatent.org. With questions about eligibility, please e-mail us at applicant@peertopatent.org.

Sign Up to Be a Reviewer

Peer to Patent only works with your help.

Become a community reviewer and improve the quality of patents:

- Share your knowledge and expertise with the United States Patent and Trademark Office.
- Work with the community, not alone, to research a patent application.
- Spend a few minutes evaluating the relevance of research to claims.
- Network with innovators in your field.
- Get noticed for your participation.
- Share in the feeling that you've done something good for science and innovation.

Help others participate by facilitating an application. As a facilitator, you will:

- Encourage community involvement by posting updates on the application home page.
- Jump-start participation with your own postings to the discussion board.
- Focus community attention on finding prior art and identifying experts who might know where to find it.
- Help flag any important or inappropriate content.
